Compact Dust suppressor - DDAXO

The De Dust AXO is the most compact Dust suppression unit in our range. It is very simple to set up, utilising a 110v 6KVA power connection and taking a standard hoze-lock water feed.

Weighing only 80KG and sitting on a wheelbarrow style chassis it is easy to manouevre around site.

With a throw of up to 20 M this small unit provides excellent value for money and also benefits from Pallet shipping, bringing down the cost of long distance transport.

	DD AXO
